

Information

OpenScape UC Application
OpenScape Personal Edition

Professional VoIP telephony and more

With OpenScape Personal Edition, you can use your notebook/PC as a telephone and make it the center of your voice communication.

System Description

Personal Edition is the latest IP-based communication software that can be used in connection with OpenScope Voice and HiPath communications systems. It is the successor to optiClient 130 / 130 S and is now available in a SIP and HFA variant.

Personal Edition is ideal for all mobile and stationary applications, offering the option of integrating corporate directories and personal call lists via LDAP. Rounded off by a highly sophisticated and intuitive user interface, Personal Edition is a constant companion for customers who also need to receive and make calls outside their office environment.

Advantages and Benefits

- Cost-effective communication solution using a common infrastructure for data and voice
- Security of investment due to a step-by-step introduction to multi-functionality at the workplace
- The Personal Edition also offers advanced features such as e.g. journal entries.
- Increased efficiency due to the use of a common user interface, both in the office and on the move
- Always the same phone number – regardless of location, users retain their own phone number for incoming and outgoing calls.

Features

With OpenScope Personal Edition, mobile PC users can avail themselves of the following functions in the field, at their home office or on business trips:

- Ideal solution for mobile workers – regardless of location, users retain their internal phone number. Take your direct dial number with you and make calls as usual whether you are using the IP infrastructure in one of your company's branches or dialing into a WLAN hotspot. Your PC-based Personal Edition enhances the multifaceted implementation options of your PC with communication software that you can use to make all calls from your personal extension. You can use this function in the office or on the move.
- By using the LDAP service, several corporate and personal directories can be integrated into the Personal Edition. Even without connecting to the directory server, your contact lists are always at hand. Dialing via keypad, corporate address book, other LDAP address books, call lists.

- Modular user interface that can be flexibly adapted to the user's requirements
- Telephony convenience functions, such as an enhanced keypad in the HFA client
- Individual access rights and other parameters remain in effect, e.g. initiated call forwarding, Do Not Disturb
- Voice compression: G.711, G.723 and G.729
- Quality of Service (802.1p)
- Support of WAV and MP3 files used as ringtone
- Video Call Management (H.263 & H.264) in SIP-version in combination with OpenScope Voice
- Optional: special screensaver that signals the phone number and allows you to accept calls directly

User Interface

The user interface is modular. It allows users to build individual window setups, each with separate functional units. In addition, the single windows can be individually arranged on the screen.

Main Toolbar (optional)

The main toolbar can be made visible and anchored to the top of the screen. You can access essential telephony functions via this toolbar, so only a small amount of space is required to operate a softclient.

Softphone

The softphone offers users telephony functions and access to function keys. It can be optionally displayed and placed in any position on the screen.

Video Telephony (SIP)

When video telephony is used, the conversational partner's picture is displayed as well as your own picture. It is possible to integrate a third participant for small conferences. The video telephony features are available in the SIP-version of the Personal Edition in combination with OpenScope Voice and are offered within the normal SIP license.

Integration of Corporate Directory/Contact Directory/Contact List

You want to use your corporate phonebook on the move? No problem. The LDAP service allows you to simply integrate your corporate directory into OpenScape Personal Edition.

You can manage individual and personal contacts in your contact directory.

A special contacts list can also include individual contacts from various directories. These can be grouped together according to a number of criteria.

Technical Data

System Requirements

- HiPath 3000 V7 (HFA)
- HiPath 3000 V8 (HFA, SIP from V8 R4)
- HiPath OpenOffice EE V1 (HFA)
- HiPath OpenOffice ME V1 (HFA)
- OpenScape OpenOffice MX V2 (HFA)
- HiPath 4000 V3 (HFA)
- HiPath 4000 V4 (HFA)
- HiPath 4000 V5 (HFA)
- OpenScape Voice V3.1 R3 (SIP)
- OpenScape Voice V4 (SIP)
- OpenScape Voice V4 R1 (SIP)

PC Requirements

- Operating Systems
 - Windows XP (32-bit, from SP2)
 - Windows XP (64-bit, from SP2 for SIP version)
 - Windows Vista (32-bit, from SP1)
 - Windows Vista (64-bit, from SP1 for SIP version)
 - Windows 7 (32-bit)
 - Windows 7 (64-bit for SIP version)
- Working memory
- At least 1 GB RAM for Windows XP
- At least 1.5 GB RAM for Windows Vista
- At least 1.5 GB RAM for Windows 7
- 2 GB RAM recommended,
- but at least 256 MB free RAM for the communication software must be available
- 1 GHz processor; 2 GHz recommended (Please note that your operating system might have further requirements.)
- Video (SIP): at least Core2Duo-Prozessor Microsoft DirectX V9.0c or later
- At least 200 MB free memory on the hard disk
- CD-ROM drive
- Ethernet network card for Quality of Service (QoS) functionality with 802.1p support
- USB support, for connecting a handset or headset

Network/QoS

- Switched network, all components IEEE 802.1p/q compatible

Available Languages

- German
- English
- French
- Spanish
- Italian
- Portuguese
- Portuguese (Brazil)
- Czech
- Chinese (simplified), only with corresponding operating system
